EXPERIENCE

Docmoonlight, — *React Native Developer*

8-2022 - PRESENT

Developed the DocMoonLight app to streamline shift scheduling and attendance for doctors, and crafted a robust Next.js dashboard with TypeScript, offering admins comprehensive control and oversight.

- Set up the app's backbone with Node.js and AWS for smooth operation and storage.
- Made user-friendly screens with React Native, including tables, maps, and calendars.
- Integration with stripe payment gateway
- Added Zoom calls into the app for doctors to talk face-to-face online.

Zacks, — *Flutter Freelance project*

5-2020 - 9-2020

I created App called Zacks that's responsible for managing employee's attendance by clocking in and out incorrect location on map.

- Used Firebase to manage database and store Authentication.
- Google maps API to track user location on map.

CrossWorkers, — *Mobile application Internship*

7 2018 - 9 2018

in this internship, I created App called IDEX that's responsible for managing clean inspections for big sites

- Create Custom render for views need.
- Filtering big lists and sorts its data.
- Apply MVVM design pattern
- Used profiler to make sure of app performance

EDUCATION

Bachelor's Degree: Computer Science

2015 - 2020

Helwan University - Egypt
My degree is: good

SKILLS

React Native

Android Native (java/kotlin)

Typescript

Flutter

Xamarin.forms

Aws - firebase - Git - Jira

Soft skills - team player

Certification & Courses

NTL - Udacity: Android Nanodegree
(2017)

Xamarin University: Xamarin
Certified Mobile Developer
(2018)

LANGUAGES

English: Very Good

Arabic: Native

German: Fair
